Portable Room with HEPA Filter

FH3X

FH3X R2 Retractable & Robust

Rent or Purchase
New or Used

Conceptions M.G.'s portable room enables safe working in ceilings and walls under negative pressure. The dimensions of our portable rooms vary in terms of their surface area and height in order to meet different needs and building constraints (size of corridors, doorways, elevators, etc.).

- Simplified work and maintenance
- Increased sanitation and security on work sites
- Reduced site preparation time

Ideal for:

Work in a hospital environment (asbestos, dust, bacteria)

General or specialized contractors

Model FH3X R2
The most robust retractable unit on the market

TECHNICAL SPECIFICATIONS

- Silent fan, 49 dba, 150 cfm
- 110 volt input, internal specification grade electrical outlet
- Standard pre-filter, HEPA filter (99.97% efficiency at 0.3µm)
- Work space:
 - FH3166 31" x 66", up to 11' work height
 - FH3378 33" x 78", up to 11' work height
- Adjustable working height
- Heavy-duty aluminum structure
- Aluminum anti-slip floor
- 2 fixed wheels, 2 swivel wheels with Heavy Duty Bickler footbrake
- Rubber seal at the top
- Lateral access
- Heavy-duty zippers at openings
- Transparent windows on 4 sides
- 2 full access openings for working in ceilings or walls (comes with flaps)
- Fireproof vinyl available in 5 colours: burgundy, blue, grey, beige, green
- 2 flap openings of 8" to 10" to access tools, pipes, or other accessories in the ceiling

OPTIONS

- NEW - Robust retractable units for easy transport
- CFM differential reader – filter status
- Windows at top or bottom of the enclosure
- Floor drain
- Personalized logo
- New or used units
- Power pack for autonomy

HF100 Anteroom

Anti-Microbial Solution

Conceptions M.G.'s HF100 Anteroom is a flexible working tool, designed and manufactured in Quebec, that allows you to work in the ceilings or walls of hospitals, schools, and office buildings without displacing any of the office furniture.

Model HF100 Adaptable and retractable for easy transport

Rent or Purchase

TECHNICAL SPECIFICATIONS

- Its flaps on all 4 sides can roll up and adapt to most office furniture
- Easy to install
- Access to all 4 sides
- Expands up to 11 feet
- Robust zippers at the 4 corners

BASIC UNIT IS EQUIPPED WITH:

- Frame made of aluminum
- 4 solid telescopic poles
- Non-flammable vinyl fabric with transparent windows
- Retractable for easy transportation

OPTIONS

- Can be connected to a HEPA filtration unit and used under negative pressure
- Several sizes and colours available
- Adapted to scaffolding use
- HEPA vacuum (DOP approved)

Wet/Dry HEPA Vacuum

V8000WD

The Powerful V8000WD Canister-Style, Wet/Dry HEPA Vacuum is an essential tool for almost every remediation and construction project. The V8000WD combines exceptional performance and portability in a compact, lightweight design. Advanced features of the V8000WD include:

- Durable, polyethylene cabinet weighs just 32lbs.
- 99.97% true HEPA filter @ 0.3µm
- 1.6HP motor delivers outstanding performance
- 135cfm airflow; 92" static lift
- Stable, low-profile design, easy-emptying

HEPA Vacuum

Nilfisk Euroclean GD930

Fully equipped to safely collect hazardous lead dust generated during renovations, the Nilfisk RRP Vacuum / GD 930 exceeds the EPA's standards of a HEPA-filtered industrial vacuum cleaner. The vacuum's multi-stage filtration system features a certified HEPA filter that captures 99.97% of dust, down to and including 0.3µm. Its tremendous suction power and durable construction make it a top choice for contractors. Features and benefits:

- Large wheel, caster, low profile and convenient carrying handle
- Sturdy steel container enables it to withstand heavy duty use
- Quick and simple access to internal parts for easy servicing
- Can be used in conjunction with vacuum-assisted power tools to collect hazardous lead debris at the source
- Quiet operation

Surge Capacity Anteroom & Containment Modules

ISOQUAD® IQ200 - Bed/Gurney Isolation Module

The IQ200 is a flexible, inexpensive and easy way to quickly increase surge patient isolation capacity that one person can pop up in seconds.

- Fits almost any bed or gurney
- Use with a HEPA filtration device to create negative pressure within the module
- Pulls in clean air at the foot of the bed and exhausts HEPA-filtered air behind the patient's head

ANTE UP® HC7917 - Inflatable Emergency Anteroom

The HC7917 can be mounted inside a patient room doorway or outside the door, entirely in the corridor.

- Inflates in minutes with the included 110-volt compressor/inflator
- Fits any 46"- 48" wide, 80" tall doorway and can be expanded for double doors
- Large zippered doors at either end are wide enough for a gurney
- Large windows with roll-up covers at each end
- Portable air scrubber and HEPA vacuum connection ports
- Tough fabric meets relevant fire/life safety standards

AIRE GUARDIAN® AG3100ARK - Temporary Anteroom Module

The AG3100ARK includes an aluminum frame and transport cart and a PVC enclosure. It can be quickly wheeled to a patient room, removed from the cart and sealed around the door frame.

- Enclosure flange fits any 46"- 48" wide, 80" tall doorway
- Large zippered doors at either end are wide enough for a gurney
- Large view windows
- Designed for use with a HEPA-CARE in-room HEPA filtration unit
- Tough military tent fabric meets relevant fire/life safety standards

Containment Products

Door Guard - Reusable Barrier (AG-DG100)

- Designed to isolate construction and renovation activities in compliance with CDC and ICRA guidelines
- Easily mounts around the perimeter of standard 80" tall x 44"- 49" wide doorways
- Built-in tiebacks for equipment pass through
- Two Door Guards can be taped together to fit over double doors up to 108" wide
- Washable and reusable
- Durable fire rated 10 mil fabric conforms to:
 - Federal Test Standard No. 191A méthode 5903
 - ASTM E-84 Class B Flame Spread
 - NFPA 701
 - CA State Fire Marshal, Sect 13115

ZipWall® - Temporary Construction Barrier (HC4PL)

- Build various enclosure sizes and shapes
- Fast and easy assembly
- Adjustable twist and lock poles
- Use with barriers up to 8 mil
- Kit includes: 2 rails (HCFR2), 4 poles (HCKT12), 4 grip disks (HCGD2), 2 heavy duty zippers (HCAZ12), 1 carry bag (HCCB1)

Sticky Mats (SM2436PK)

- 24" x 36" blue polyethylene sticky mats; sold in packs of 4 (120 mats) or 10 (300 mats)
- Pressure-sensitive adhesive on top of each mat removes contaminants from shoes and wheels
- Peel and toss away top sheet when dirty

Adhesive Back Grill Masks (K1-GM-13)

- Seal off supply and return grills
- Prevent HVAC system dust contamination
- Attach securely but leave not reside when removed
- 13" wide x 185' long; 3 rolls per case
- Part # K1-GM-DS13 convenient dispenser

Poly Hangers (PHC101)

- Supports poly sheeting from ceiling grids
- Simple to install, remove and reuse
- Prevents damage to building from fasteners or tape

Heavy Duty Zipper (HCHDAZ2)

- Package of 2

Capsules Suitable for Your Pneumatic Transport Systems

Capsules are available in a variety of colours in order to identify different departments or content, or to designate a specific status or "stat", such as "BIOHAZARD" or "URGENT". Transparent capsules are available in clear, red, yellow, blue, and green. Opaque, high-strength capsules are available in black, red, yellow, blue, and green.

These capsules are available in a leak tight version with or without an antimicrobial agent.

It is now possible to replace the leak tight bands of your 6" capsules with a Velcro strip that will save time and money in future replacement costs or continue to use the traditional carpet.

The sealing of the 4" capsule strips are available in velcro only. We offer a wide range of capsules to meet everyone's needs (2"1/2, 3" or other size systems).

We also offer capsules specially designed for industries like metallurgy, cement factories, etc...

STP - Intelligent Capsule
